

The Old-Guy's No-Math Test

How confident are you that you could perform the following math tasks?

1 = not confident at all

2 = not very confident

3 = somewhat confident

4 = confident

5 = completely confident

Counting backwards from 100 to 0. 1 2 3 4 5

Repeating the times tables with 95% or more accuracy. 1 2 3 4 5

Multiplying fractions. 1 2 3 4 5

Adding unlike fractions. 1 2 3 4 5

Converting fractions to decimals. 1 2 3 4 5

Solving arithmetic word problems. 1 2 3 4 5

Translating a word problem into an equation. 1 2 3 4 5

Finding the slope of a line. 1 2 3 4 5

Using the Pythagorean formula. 1 2 3 4 5

Explaining the quadratic formula. 1 2 3 4 5

The lowest possible no-math no-score is 10 and the highest is 50. A no-math score below 35 suggests your math needs a bit more work. You can do that work on your own or along with other members of your instructional team, using online resources such as those referenced in this module.
